Samstundis sum politiskir leiðarar savnast fyri aðru ferð til ráðstevnu í Evroparlamentinum um, hvussu vit kunnu flyta okkum burtur úr vakstrarparadigminum, síggja vit, undirritaðu vísindafólk og sivilsamfelagsfelagskapir, ta geopolitisku kreppuna sum ein móguleika fyri at leysríva okkum frá tí sosialt- og umhvørviskaðandi kappingini um vøxtur. Vit eggja í staðin til samstarv um øktan trivnað (wellbeing).

Tað finst einki empiriskt grundarlag fyri, at tað í nøktandi mun ber til at sundurskilja búskaparvøxtur frá ovbyrjing av umhvørvinum altjóða sæð. Strembanin eftir óendaligum búskaparvøxtstri hjá háinntøkulondunum er ein trupulleiki, tí hon antin minskar um ella útjavnar náttúru- og umhvørvispolitisku tiltøkini, sum vit seta í verk. Veðurlagsóskeytið og umhvørvisoyðingin, sum okkara samfelag er tongt at, er ein eksistentiell hóttan móti friði, vatn- og mattryggleika og demokratinum.

At menna okkum fram móti einum post-vakstrarbúskapi snýr seg ikki einans um at yvirliva, men eisini um at fremja trivnað. Hetta krevur eina demokratiskt planlagda og rættvísa niðurskalering av framleiðslu og nýtslu - onkuntíð kallað ‘avvøxtur’ - í teimum londum, sum í dag hava eina ovurnýtslu av náttúruilfeingi. Ein tilík gongd hevði í

veruleikanum verið ein evrópeisk friðarverkætlan, tí stöðan í dag er, at búskaparvækstur skapar konfliktir bæði í og utan fyri Evropa.

Í háinntøkulondunum merkir eitt lægri vistfrøðiligt fótaspor ikki neyðturviliga verri lívskor. Ein politikkur grundaður á eitt prinsipp um “nóg mikið” (sufficiency), ið leggur áherðslu á sparsemi, avmarkingar av tilfeingisnýtslu og niðursetta arbeiðstíð, kann økja um trivnaðin og samstundis minka um trústið á umhvørvið. Hetta skapar móguleikar fyri burðardyggari vælferð utan vøkstur.

Fyri at tryggja hægst móguligan trivnað og vælferð við lægst móguligum fótasporum er neyðugt, at vit grundleggjandi endurhugsa bæði endamálið við búskapinum og eisini búskaparligu spælireglurnar. Í einum post-vakstrarbúskapi verður núverandi denturin á at skapa kvantitativan vøkstur skiftur út við ein regenerativan búskap, ið hevur sum endamál at skapa trivnað og at levera kvalitativa vælferð við at nøkta tørvinum hjá øllum innan fyri jarðarinnar mørk – eins og í búskaparfrymlinum “Doughtnut Economics”.

Marknaðurin vísir seg ikki at vera egnaður sum grundarlag fyri teimum týðningarmiklastu avgerðunum í okkara samfelag. Um búskapurin skal tæna fólkinum og ikki umvent, má fólkið fáa stýringina av búskapinum aftur. Fyri at broyta spælireglurnar eiga vit at læra frá eksisterandi átøkum, t.d. at menna og spreidda frymilin um almannagagnlig samvinnufeløg kring alt Evropa.

Í ljósinum av hesum bráðfeingis avbjóðingum og stimbrandi móguleikum heita vit á Evrópeiska Samveldið, tess stovnar og limalond at seta í verk:

1. **Post-vækstur stovnar í Evropa:** at seta á stovn varandi bygnaðir í ES-kommissiónini, ráðnum, parlamentinum og í limalondunum, sum skulu gera metingar av ymiskum strategi- og planleggingararbeiði, ið skal til fyri at útinna ein post-vakstrarbúskap.
2. **Eina evrópeiska Green Deal fyri post-vækstur:** at gera eina stevnuskrá, sum er grundað á eina broytingartilgongd, ið leggur seg eftir at skapa eina blómandi framtíð innan jarðarinnar mørk við avvækstri sum eitt neyðugt skiftisskeið fram ímóti einum post-vakstrar búskapi.
3. **Post-vakstrar politikkur** er grundaður á tey fýra prinsippini um:
 - **Biokapasitet:** útfasing av lívrúnum brennievni, mørk fyri rávøruúrdrátti og náttúruverndar- og náttúruendurbøtingaráttøk, sum skapa eina sunna og

mótstöðuføra jørð, skóg, hav og aðrar vistskipanir. Til dæmis eina avtalu um ikki at spreidda lívrúnnin brennievni, eina lóg um tilfeingisrættvísi og -mótstöðuføri, sum umfatar eitt bindandi mál fyri minking av materiella fótasporinum og veruliga økisgrundaða náttúruendurbøting.

- **Rættvísi:** skattaamboð, ið eru við til at fremja eitt javnari samfelag við at burturbeina ógvusligan inntøkuójavna og ekstremt ríkidømi, eins og ovurvinning. Til dæmis ein CO2-ognarskat og bæði eitt lágmark og eitt hámark fyri inntøkustøði.
- **Vælføerð til øll:** eina tryggjaða atgongd til týðandi infrakervið umvegis ein betraðan umhvørvisvinarligan vælføerðarstat. Til dæmis algildar grundtænastur (íroknað menniskjarætturin til heilsu, flutning, røkt, býli, útbúgving, sosiala vernd, o.s.fr.)
- **Virkið demokrati:** borgarafundir við heimild at orða sosialt hóskaði strategiir og at styrkja politikk, ið tekur útgangsstøði í jarðarinnar mörkum, rættvísi og trivnaði fyri øll, umframt einum sterkari leikluti hjá fakfeløgum. Til dæmis ein pall, har tað ber til at kjaka um staðbundnar tørvir, veðurlagslógir, og at menna lutakaragrundaðar figgjarætlanir.

Tað eru fimm ár síðan, tann fyrsta “post-vøkstur”- ráðstevnan var. Í sivilsamfelagnum og í vísindaheiminum eru vakstrarkritiskar hugsanir vorðnar alsamt sterkari. Í Evropaparlamentinum verður í hesum døgum kjakað um smálutirnar í hesum hugsanum saman við Evropakommissiónini. Vísindalig vitan og politiskt innlit er til taks fyri at hugsanirnar um avvøkstur og post-vøkstur verða til veruleika. Kreppurnar, sum vit í dag eru í, eru eisini ein gyltur móguleiki fyri at skapa eina nýggja skipan, ið er før fyri at tryggja trivnað og vælføerð til øll, samstundis sum hon loyvir eitt blómandi demokratiskt lív og einum spakuligari og tó hugaligari máta at liva uppá.
